

# Package: grnn (via r-universe)

August 21, 2024

**Title** General regression neural network

**Description** The program GRNN implements the algorithm proposed by Specht (1991).

**URL** <http://flow.chasset.net/r-grnn/>

**Version** 0.1.0

**Author** Pierre-Olivier Chasset

**Maintainer** Pierre-Olivier Chasset <pierre-olivier@chasset.net>

**License** AGPL

**Collate** 'create.R' 'grnn-package.r' 'guess.r' 'kernel.R' 'learn.R'  
'smooth.R'

**Repository** <https://chasset.r-universe.dev>

**RemoteUrl** <https://github.com/chasset/grnn>

**RemoteRef** HEAD

**RemoteSha** 63a4771f2fa033df36547de8c7ef8e9dd52f0fa9

grnn-package

*GRNN*

---

**Description**

General regression neural network.

**Details**

The program GRNN implements the algorithm proposed by Specht (1991).

**Author(s)**

Pierre-Olivier Chasset

**References**

Specht D.F. (1991). A general regression neural network. *IEEE Transactions on Neural Networks*, 2(6):568-576.

---

guess

*Guess*

---

**Description**

Infers the value of a new observation.

**Usage**

```
guess(nn, X)
```

**Arguments**

|    |   |
|----|---|
| nn | A trained and smoothed General regression neural network. |
| X  | A vector describing a new observation.                    |

**See Also**

[grnn-package](#)

**Examples**

```
n <- 100
set.seed(1)
x <- runif(n, -2, 2)
y0 <- x^3
epsilon <- rnorm(n, 0, .1)
y <- y0 + epsilon
grnn <- learn(data.frame(y,x))
grnn <- smooth(grnn, sigma=0.1)
guess(grnn, -2)
guess(grnn, -1)
guess(grnn, -0.2)
guess(grnn, -0.1)
guess(grnn, 0)
guess(grnn, 0.1)
guess(grnn, 0.2)
guess(grnn, 1)
guess(grnn, 2)
```

---

learn

*Learn*

---

**Description**

Create or update a General regression neural network.

**Usage**

```
learn(set, nn, variable.column = 1)
```

**Arguments**

|                 |  |
|-----------------|--|
| set             | Data frame representing the training set. The first column is used to define the category of each observation (set category.column if it is not the case). |
| nn              | A General regression neural network with or without training.  |
| variable.column | The field number of the variable (1 by default).   |

**See Also**

[grnn-package](#)

---

`smooth`*Smooth*

---

**Description**

Smooth a General regression neural network.

**Usage**

```
smooth(nn, sigma)
```

**Arguments**

|                    |  |
|--------------------|--|
| <code>nn</code>    | A trained General regression neural network. |
| <code>sigma</code> | A scalar.                                    |
